Carine Regional Open Space
Okely Playground Consultation Report

Summary

Earlier this year, the City sought public feedback on a proposed playground upgrade at Carine Regional Open Space (Okely Rd).

The existing Okely Rd playground is due for renewal and an upgrade to a community parkland, similar in scale to the one at Charles Riley Reserve, is proposed. As a part of the design process, the City engaged with the community to identify existing issues, and ensure any future changes will meet the needs of the community. The consultation identified the following key elements for consideration:

- A new playground;
- Basketball shooting area improvements;
- New/improvements to the picnic facilities;
- Investigation of pedestrian access (including accessibility) throughout the area.

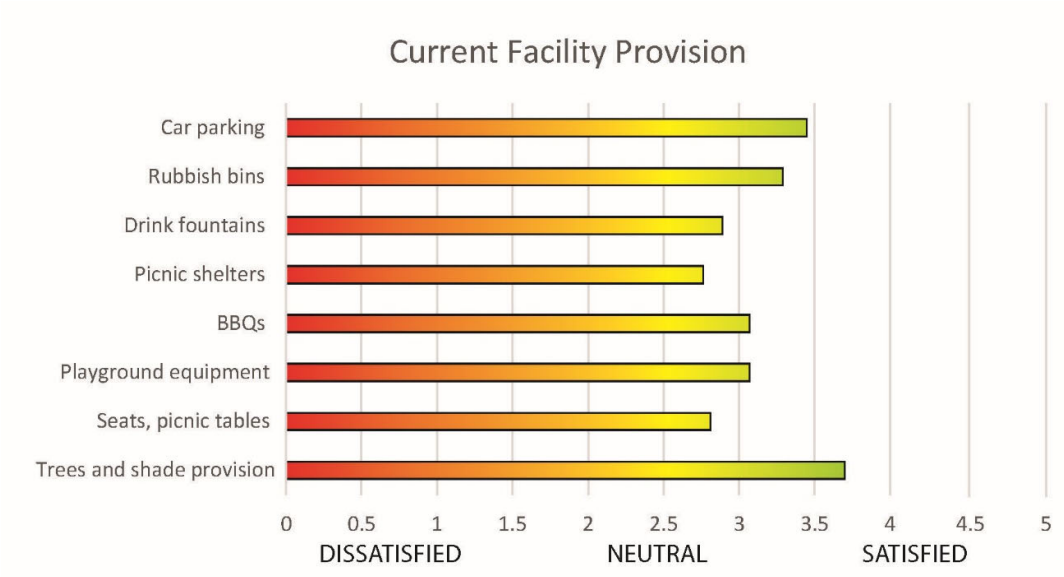

The public consultation process commenced 9 March 2023 and concluded 6 April 2023 (4 week duration). The following methods were used to engage the local community:

- Signs on site
- Letters to residents within 800m (over 2,600 letters sent)
- Facebook posts on the City's page
- Project information page on the City's website

The City received 202 survey submissions and 6 email submissions during the public comment period, totalling 208 responses.

Consultation Summary

Comments made during the public consultation indicate that Carine Community Parkland is a very popular facility and is much loved by the community. Residents are pleased with the provision of facilities as per the following graph of outcomes:

An issue that was raised in numerous submissions was encroachment of dogs within the playground space. This was seen to be an ongoing issue by residents. The City will look to alleviate this issue as much as possible during the design process and design interventions will be considered.

Next Steps

The outcomes of the public consultation will be used to help develop a plan for the upgraded Carine Community Parkland, taking into account City wide strategies, facility provision and maintenance capabilities.

The project will now proceed to design phase. Residents will be advised when the landscape plan will be available for public comment.

Consultation Responses

Enclosed is a summary of public responses to the survey questions. Comments have been grouped into the issues they relate to which gives an impression of community sentiment regarding specific elements. It should be noted that comments have been summarised to remove personal or identifying information. Similar comments expressing a similar sentiment have been grouped.

The City has given responses to comments where possible.

Survey results are also included.

Locally-led Stirling

Carine Community Parkland Playground Upgrade

Engagement

The City of Stirling recognises Okely Rd playground at Carine Regional Open Space is a highly valued local asset. The City is focused on providing play opportunities to meet current and future community needs and ensure we continue to develop a diverse and accessible network of safe play experiences across the City.

Local engagement was undertaken throughout March 2023 to better understand local priorities and how the current playground area is being utilised. A total of 210 online surveys were completed, below is a summary of the findings.

You told us

What words would you use to describe your suburb?

97%
Neighbourly rating

79%
Sense of belonging

"Friendly and safe for adults and children. The open space and the new developments are fantastic, e.g. lighting, new club house, fenced dog park, new cricket building."

If you could change one thing about your local area what would it be?

Parks and reserves (17%)

"Few more parks/upgrade the current ones."

Road & traffic management (17%)

"Parking and road safety around Carine Primary School and Carine Senior High School."

Parking (9%)

"Parking around the high school and primary school."

Trees and greening (5%)

"More trees lining the streets as a canopy."

Crime prevention (5%)

"Juvenile misdemeanours."

Cycleways (5%)

"More bike lanes and bitumised bike paths instead of concrete footpaths."

Do you have any other comments about the existing playground?	
Comment	**City Response**
I dont have small children so I dont use the playground equipment. But we would like to see a bike path that is more in line with the walk path all the way as currently we have to use the walk path (when the bike path runs out onto the busy roadside) to ride our bikes as we are exercising our dog whilst riding and a lot of people also walk on the path making for a lot of congestion and possible accidents.	Noted.
I used to visit this playground weekly, now I find it always with random dogs roaming freely around and in it, the dog owners never have their dogs on leads, the dogs jump on the kids and no one cares, in fact the dog owners mostly smile and wave like they are doing us a favour. My kids end up terrified and screaming, now we just avoid the playground all together, like many mothers. The playground sadly MUST be fenced for the kids protection	Noted.
There's regularly a queue for the toilets and BBQ but other than that it's great.	Noted.
Please ensure multi age children can use the facitlies.	Noted.
I like the playground as it caters for a range of ages.	Noted.
Definitely need a decent basketball run up n ring. A court (with 2 rings) would be fantastic n bring the youth 2gether n away from their screens!	Noted.
Good size	Noted.
Playground & facilities for tweens & teens as well as toddlers.	Noted.
Need more for all ages not just the big kids	Noted.
It definitely aged and requiring upgrade. My children are almost 8 and 10 and have 'aged' out of its use - so it would good while kids were in pre-primary - but I don't feel it is entirely suitable for babies and toddlers; nor older kids.	Noted.
I didn’t think anything wrong with it. Always busy though. Thought the one on Monyash Rd could probably need more attention-shade, benches, accessibility as it’s frequently used by children taking part in horse riding.	Noted.
This small park and playground is perfect in scale as a local community playground and currently accommodates a wide variety of activities and uses and is a safe area for kids. These I have observed in using this local park multiple times a week during different times of the day in all types of weather over the past 33 years. Upgrading the play equipment and basket ball area is welcome.	Noted.
It's very dated and no existence of any nature play	Noted.
Just becoming tired and doesn’t align with the new thoughts re outdoor imaginative nature play.	Noted.
Looking outdated.	Noted.
Please make provisions for older children; over 10’s.	Noted.
Cramped, restricted age groups	Noted.
Great slide and climbing structure for 3+ aged kids	Noted.
Only suitable for younger children. Would be nice to have something for older kids (e.g.9 or 10 years old) to do.	Noted.
Would be great to have a coffee kiosk to the south of the playground with outdoor seating	Noted.
Love it so whatever is replaced needs to be better and have the same sort of equipment	Noted.
Needs more shade sails. Kids are burning their feet when the sun is out. Equipment gets too hot to play on.	Noted.
My children have enjoyed the slides and variation in height and tunnels and ways of accessing the slides. they have also enjoyed the little table in the sandpit only area.	Noted.

Do you have any other comments about the existing playground?

Comment	City Response
It's a bit dull and does not incorporate well into the space. Dog facility is better!	Noted.
All ages love the current playground so it would be great to have a playground replacement suit ale for various ages	Noted.
Existing playground is small for the regional open space status and does not have sufficient variety in types of play. The slides have little shade and get hot early in the day BBQs do not have sufficient safety mechanisms and can be turned on by small children	Noted.
Would love to see an upgraded playground	Noted.
I have always thought that the 1/4 basketball area was just dumped in that spot, the ground next to its concrete foundation drops away and would seem to be a problem if using the basketball area. I would like to see a bigger, actual half court but placed in a level ground area, hopefully a spot that sees the sun.	Noted.
Not at this stage	Noted.
The existing playground is very dated, though parts are accessible due to ramps. Needs a huge upgrade- this playground is a gathering point for parties, and is used by children of all ages. The large trees at the playground must be kept but more tree planting for future generations must be considered (this will also be natural shade in years to come!) Basketball facilities limited.	Noted.
Please be sure to keep bike parking as part of the facility. Same or better - it needs to be able to lock bike frame to the bike parking, not just the wheel.	Noted.
Maybe a 'no dogs allowed' sign. There's a dog park next to the main playground yet people regularly allow their dogs to run all over the children's plY equipment, often scaring young children.	Noted.
some more seating outside the playground for older people to stop and have a coffee or drink	Noted.
This is a great accessible playground for all ages - unique to the area, we enjoy coming here for this	Noted.
How will the upgrading project impact Carine Glades parkrun since our finish line is in close proximity of the sheltered picnic table by the playground? We currently have over 300 parkrun participants every Saturday meet and finish there for a free, weekly, timed, community event which is inclusive in nature and aimed at increasing health and wellness in the community. parkrun offers a safe place for people to walk, run ,jog, spectate and volunteer and to feel part of the wider community. I have concerns that this wonderful initiative may be pushed aside during upgrading works. It has been part of our weekend ritual for aver 8 years and would have a huge impact if it were to be cancelled or if we were to loose our beautiful shaded congregation space for pre and post parkrun catch ups.	Noted.
The playground is functional but, I've observed at times it's too crowded therefore expansion would be good for families.	Noted.
Basketball area (just south of the playground - might feature two sizes - one for smaller kids and the standard size for bigger kids and adults	Noted.

Do you have any other comments about the existing playground?

Comment	City Response
My toddler who is 18 months loves this playground. The ramps and steps make it suitable for him to climb and use the slides. Many playgrounds don't cater for toddlers or they put the toddler section a big distance from the main playground (makes it hard when watching multiple kids of different ages). The Charles Riley playground only caters for older kids, the slide structure is dangerous for toddlers but there is no alternative for them. There isn't enough shade and a lot of the limestone seating is in the sun. I visited this park recently with my 18month old and it was a stressful experience. We always have a wonderful time at Carine.	Noted.
As a regular user of this playground there are ongoing issues with dogs entering the playground. Signposting is ineffective and dogs encroaching present a safety risk along with health concerns from digging/urinating/etc in the sand. I have raised this with the City previously and was advised that there was no evidence of dogs entering the playground. I am happy to share photographic and video evidence of occurrences. Fencing the playground would inhibit the risk of dogs (often off-lead and out of control) entering the playground from the dog exercise area and the oval.	Noted.
When it's hot we can't use it because the shade sails have gaps (too much sun) and the ground is too hot where the sun reaches. I don't feel comfortable with my kids playing in the sand - there is always rubbish in it, so I don't think it's maintained.	Noted.
Its a great playground, I honestly don't understand why it is being upgraded as it still seems brand new. Hardly a good use of ratepayers money.	Noted.
	Noted.
The location of the playground is very close to the dog park. An issue we have experienced is people parking their cars to bring their dogs to the dog park. But they do not keep their dog on a leash until they get to the dog park. They let their dog off leash and the dogs then charge through the playground enroute to the dog park. Our 18 month old was millimetres away from a bad accident with a big dog nearly running straight into her. Perhaps if the location of the playground cannot be moved to be further away from the dog park, then the playground could be fully fenced in to prevent dogs from running into the play area	Noted.
My young boys have used it for years, and it's good at handling large volumes of kids with few bottlenecks. The deciduous trees and shade are lovely.	Noted.
It's very good but we would love some components that suit older children (5+) like a flying fox, bike pump track, circular swing that can fit several children.	Noted.
It's a great play ground but maybe needs to be gated	Noted.
Would love a playground appropriate for children aged younger than 2 years	Noted.
For such a large open space the playground is relatively small and it is absolutely heaving on the weekends!	Noted.
Very old and run down	Noted.
I think the playground at Carine is a great place for kids to have fun and enjoy themselves. However, I do feel that the play equipment is somewhat limited. As the only iconic playground in the area, I believe that it should be more expansive and offer a wider range of play equipment and activities. This would help to make the playground even more attractive to families and visitors and provide a greater variety of experiences for children.	Noted.
It is a good playground that considers kids of all ages.	Noted.
It is not challenging enough for the kids.	Noted.

Do you have any other comments about the existing playground?

Comment	City Response
It would be nice to see this playground area expanded to be more like the playground at Charles Riley Reserve but I don't think it should expand to be any closer to the enclosed dog exercise areas. Better to expand up the hill and further northwards. Perhaps basketball nets could be the divider between the playground and the dog enclosures.	Noted.
Not interesting or exciting enough.	Noted.
It is looking very dated and not very inviting for kids these days.	Noted.
The plane trees are stunning and the current structure is adequate.	Noted.
It's great for my 3 year old, one of the few where he can play on almost everything and still push himself	Noted.
Not enough swings .	Noted.
Good size, good location, well laid out, mostly out of the sun. It gets very busy so the size is good to accommodate a lot of kids.	Noted.
The existing playground caters for both of my children (5 & 2.5). The walk ways allow for my 2.5year old to play freely and happily, whilst still been able to explore safely. My 5 year is kept happy with the extension of the monkey bar area and the climbing net. Both my children play happily and for a long time at this playground, it is visited frequently by both our immediate and extended family.	Noted.
It's a great playground and it caters for all ages. Toddlers through to primary school kids are able to use it.	Noted.
Drinking fountain is far away from the playground and more for dog use	Noted.
It is great but it’s too young for my kids.	Noted.
Children enjoy the existing playground and is very busy during holidays and weekends	Noted.
Current shade isn't permanent for rain/sun. Playground gets very hot or wet as well as the floor too.	Noted.
We love the format of the current playground and will be very disappointed to see it changed to something like charles riley. We would prefer something similar to what is there now. Thank you.	Noted.
Needs to be bigger or 2 playgrounds to be built extending south from the current one.	Noted.
Very outdated.	Noted.
the trees provide lovely shade but more shade over the main playground equipment would be ideal.	Noted.
Perfect. Other playgrounds in COS much more in need. Eg Clarko	Noted.
The playground urgently needs an upgrade or in fact complete rebuild with natural materials and opportunity for exploration and free play	Noted.
The drink fountains don't always work.	Noted.
I like the disine of the climbing frame.	Noted.
The shade sail doesn’t cover the whole playground leaving the popular slide and climbing frame uncovered and therefore very hot by 10am in summer.	Noted.
The playground is very small given the amount of children that visit there.	Noted.
The soft fall is constantly being repaired as it’s old and tired or it’s been used thoroughly!	Noted.
People tie their dogs to the very few poles available and it creates a smaller space with kids and dogs in the same space. People will always bring their dogs with them, and that’s fine, but if there was a space to tie your dog close but not on the playground, that’s be better planning	Noted.
Car parking space near fenced dog area is very poor.	Noted.

Do you have any other comments about the existing playground?

Comment	City Response
I love the playground for our family. I love the shade and trees. It could all do with some TLC but we do feel lucky to live so close.	Noted.
The equipment doesn't suit small toddlers to primary school kids. There's not enough for both to get out of It's not that safe given that a lot of bugger kids use the ovals for sport and then come over to the only playground area (on that western side) and mix in with the little bubs. But where else can they go?! So I get it.	Noted.
It's a busy area with the playground, basketball hoop and fenced dog park.	Noted.
If you make the playground bigger you need more parking	Noted.
I think that an upgrade similar to the one mentioned at Charles Riley Reserve would be fantastic.	Noted.
Geared towards younger children	Noted.
It's a really nice playground! With plenty of space for parents to sit and monitor little ones.	Noted.
Cars reverse park along the edge of the footpath NE of dog park, so their tow bars overhang the path. Difficult navigating for people, dogs & bikes when these paths are so narrow.	Noted.
The existing playground is very satisfactory. The only thing missing would be more swings.	Noted.
It's been good, not great for small or big kids, covers mostly middle to upper primary.	Noted.
Existing playground is great for older kids but could have more options for toddlers.	Noted.
No issues with the current playground	Noted.
It is too small and only accommodates 0-7 honestly. There are not enough shelters for parents to sit.	Noted.
Need more swings and activities for older children too	Noted.
Used to use it a lot but had too many incidents with dogs and dog mess - dogs off lead jumping on us, wee-ing on our picnic blanket, eating our food, dog mess in the sand.	Noted.
Should have safety cover on the high slide. I have seen many kids nearly fall off the top and sides.	Noted.
I'd Like the sit closer to the play equipment on grass A few more picnic tables would nice I've never used the BBQs because I don't think the quality is that great.	Noted.
Very basic playground and not much fun for child above 9y… we go to other suburbs instead as they have better options	Noted.
Generally the facilities are ok, but there are a lot more modern parks nowadays - it would be great to have a modern and attractice playground in the neighbourhood	Noted.
More shaded picnic areas where people can sit would be good.	Noted.
Only caters to up to about 5 years old.	Noted.
Like the soft fall flooring, really dislike the sand.	Noted.
The playground is looking a bit tired and could do with more seating.	Noted.
I like how it caters to both toddlers and older school ages children.	Noted.
Only caters for young children.	Noted.
These have been great for my kids but need upgrading in line with other parks	Noted.
It is quite good, maybe getting old but there is lots to do and it's quite large and well shaded, there are different types of things to do and suits a few age groups	Noted.

Do you have any other comments about the existing playground?

Comment	City Response
I feel that the playground isn't very safe for small children, ages 1 til 4/5yrs old, the yellow metal stairs to get up onto play equipment are steep slippery and dangerous especially when stand is all over them, the high of the levels to climb up onto the different platforms is at an unnecessary height, and the amount of dogs running around through the playground makes it very unsettling. The fact there is no fence and no signs around stating keep dogs on leads makes it very hard to feel safe when you have two kids at the playground one adult and dogs running through.	Noted.
More nature play based would good. Accessibility could be improved	Noted.
No need for the basketball ring I never see it used.	Noted.
Enjoyed very much by my young children	Noted.
too close to the dog park	Noted.
Doesn't cater to 2-3 years old toddlers..	Noted.
Kids love it. Only larger size playground in local area	Noted.
Despite this project it is still in good condition	Noted.
Disrespectful dog owner with dogs off the lead often cause issue for children playing/ people eating in the area, it would be great if the play and food area could be fenced off.	Noted.
More shade around the basketball court would be fantastic. The grass on the Okely Rd side in summer often looks dry, maybe an upgrade to the irrigation system to be able to utilise the space more.	Noted.
It is old and shabby and far too small for the number of children utilising it	Noted.
Yes it is just way too small, and only for children under 6 so the siblings join in sometimes, and then it is so crowded that the little ones stop playing and if a celebration is happening, it is like sardines trying to have a party in a tin.	Noted.
Good	Noted.
We love it! Theres enough variety for kids from aged 0 till about 12, and they love the metal bridges and connecting structures, which are great for chasey etc. adults appreciate being able to sit on the wall and chat while supervising, due to its compact structure with good visibility.	Noted.
It definitely requires more shade. On a warm day we cannot go here as there's no shade for my children.	Noted.
The existing playground is fine, and does not need "renewal". This would be a waste of ratepayers money	Noted.
Add more shade or trees around	Noted.
Toilet facilities are awful	Noted.
It's been great but it definitely need an upgrade.	Noted.
The existing equipment suits younger kids. It would be good to have facilities for older kids (6 - 10) also	Noted.
I'm surprised the existing playground is considered at the end of its life - it seems pretty good.	Noted.
The playground needs some maintenance, but is quite good and enjoyed by the kids.	Noted.
It's the only playground at Carine Open space, which is a very large facility. It needs to be an appropriate size for the number of people and children who visit. There is no point having minimal facilities for such a large number of people who attend.	Noted.
Location is good. Equipment seems old.	Noted.
As a local resident I regularly bring my children to the park. It's an amazing place and we're very lucky to have such a space.	Noted.

Do you have any other comments about the existing playground?

Comment	City Response
The current play ground equipment is dangerous, slippery and wet during the winter because of water and wet sand. Some slides and equipment are too hot to use in the winter because the aren't covered under the shade sales	Noted.
More seating and covered areas needed as well as more rubbish bins. The existing bins get too full or overflowing at times	Noted.
The current playground is not really suitable for toddlers. Its height means an adult has to be either on or nearby. Older children on swings are a danger to little ones and they can be a bit too demanding of the equipment.	Noted.
The current playground is excellent for a wide range of ages, with its ramp access great for toddlers to run around, steps, different size slides. It is very spacious and we like the mix of sand and soft surface, the toddler area, monkey bars that aren't too high	Noted.
If you would like to upgrade the park facilities, I believe you should invest in Dereeding the lake. This is an introduced reed and was not always at this park. My husband grew up in Carine, and remembers when the lake was beautiful and blue, full of birdlife, turtles, swans. Now with all the reeds we have more snakes and we are losing the beautiful water. You have planted plenty of trees already, let's pull out these reeds.	Noted.
The exiting playground needs to be expanded as it well used particularly on weekends. The current playground is limited especially when there are many families trying to use it and it is not coping with large numbers. The Playground needs more separation of age groups as well, areas specific for ages 2 to 5 year olds, 6 to 10 year olds and older children above 10 years needs to considered as the current playground seems to be a mismatch of everything together.	Noted.
Barriers along the playground edge are great as they afford children protection at heights however still permit parents to keep a close eye on the kids. Softfall requires replacement as is cracking and separating Trees in the area are great as offer both shade and ambience	Noted.
Often very full on weekends so more bins, parking, toilets, picnic shelters required.	Noted.
For a long time we have been thinking the current playground does not reflect the beauty of Carine Open Space/fit the environment nor the amount of people that it services. Gets very hot. A bit small for the amount of people that come. Very plastic/not fitting with the environment.	Noted.
We really need a fully fenced playground to protect our children especially little toddlers. I've been travelling 20-30mins for a fully fenced playground as we have none in the nearby neighbourhood. Also, the the play equipments are for older children and it looks dangerous for little children under 5. I visit Carine open space very often as I live close by and I see a lot of parents with young toddlers. While older children are at school, young toddlers play at the playground but the equipment is not really age appropriate for them.	Noted.
Too many dogs coming pounding up to the playground means we can't relax because we have to wrangle our children the minute a dog approaches. There's not enough education to dog owners nor enforcement that dogs are not to go near playgrounds. Including those that owners deem "they're ok they won't hurt you" - not the point at all !	Noted.

Do you have any thoughts or suggestions on the new playground?	
Comment	**City Response**
No, it looks like you will do a fab job, so keep up the great work around the playground facilities.	Noted.
None I think the existing playground is great.	The exisiting playground and rubber softfall are at the end of their asset life. The main combination unit in the playground is 24 years old.
As above, I question the need for an upgrade. I am aware of many other playgrounds that are much older than this which need it more than here does.	
Very hesitant on a new playground when the old one is fine.	
Leave it alone, and channel the funds into the antiquated Hamersley Golf Course instead.	
It should be a park first - it is an open space - and not get filled up with too many permanent structures	Carine Regional Open Space is classified as regional open space, and caters for a large, regional catchment. It is the City's highest reserve and playground classification. The provision of facilities aligns with this designation.
Pretending that this small area is like Charles Riley Reserve and can easily accommodate the scores of additional visitors and the additional traffic that will be attracted to a large playground and BBQ facilities, will destroy the very nature of what is currently a lovely LOCAL community park. The proposed scale of the new development will therefore be very disruptive to the current residents near to this local small park. Why does our Shire wish to ruin a local community park when there is a Regional Open Space nearby? Retention of the grass oval for kids to run, kick/throw a ball, fly a kite, play cricket/T ball, play with their dogs and enjoy the outdoors is imperative. There is currently plenty of space for picnics in the shade on the lawns under the trees.	
Put it elsewhere. Several other parks nearby are crying out fir upgrading. Eg i would love to see a small cycle track round the Ballidon park so kids could learn simple road rules while visible to parents in the middle. The playground at Okeley and Lorraine is pathetic, again, a sprinkler water play area would be great next to that, and some more equipment for small kids.	
Fencing	
Fence it off - no dogs allowed.	Fencing of the playground is not required in accordance with the City's playground policy. Further investigation has been undertaken to establish the core reason for dog encroachment into the playground area,
fenced	
There is also evidence that fenced play areas are beneficial for children's play - they are, surprisingly, more adventurous than non-fenced play areas.	
A fence the whole way around the playground.	
Would be nice if the new playground is fenced, so the parents don't have to worry about the dogs from the nearby dog park.	
It would be great to have the playground fenced off considering the amount of dogs off lead and small children running around.	
Consider fencing the area	
fully fenced with gated entry	
Fence the playground as there is a lot of dogs entering it… it's very stressful for parents with small children especially	
For the toddler area, a fully fenced option is a must I think as there is a large car park not to far from the existing playground and the traffic is fairly busy throughout the day including big buses. Also this will surely be able to protect the toddlers from unleashed dogs and prevent the dog owners from bringing their dog into the playground.	

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
Fence around playground. Dogs are off lead in the area and I have seen them doing their business in the sand pit. Also in winter the lake can be very close and kids will wander over.	which appears to be more prevalent than other reserves. The issue appears to be a combination of the high number of dogs that are exercised at the reserve and the footpath arrangement/intersection near the playground. This will be taken into account during the design phase of the project.
Please fence the area off to stop dogs	
fully fenced TO KEEP DOGS OUT	
Fenced playground, no dogs allowed!… or if children have more rights then dogs no dogs off leads in the playground area and in the space around the playground.	
Small fence put in to keep dogs out of the playground unless on a lead. Too many dogs come in while little kids are playing and scare the kids	
Would be good to have it fenced in to contain children and keep dogs out.	
I feel having a fenced area to stop the dogs running through and	
Most of all, make it fenced	
Basketball	
Basketball etc for older kids would be good.	Noted.
Please ensure the Basketball shooting area is at least the size of a full scale Basketball half court and includes all necessary court markings (key, three point line, etc). This will allow 3v3 games to be played which has recently been introduced in the olympics.	Noted.
The basketball area should be upgraded with a full court or possibly a couple of half courts with suitable lighting	Noted.
Please build a 3x3 basketball court. There is nothing there for our youth after they outgrow the swings	Noted.
upgrade the basketball court as it's quite small	Noted.
The basketball area needs to be at least half court size with the correct markings	Noted.
Basketball area would also be great	Noted.
Larger basketball court	Noted.
basketball half court,	Noted.
Basketball shooting area improvements. My view is the children that would use these facilities are also likely to use the skat park facilities. Any new basketball facilities should not be located near a young childrens playground. Rather the basketball facilities should be located over near the skat park.	Noted.
I increase in number of basketball hoops and court area would be great,	Noted.
Basketball, area to park bikes	Noted.
Coffee Van	
It's refreshing not to have a cafe nearby because it attracts a different crowd, so would love to see it kept that way!	Noted.
My main feedback is that it would be amazing to have a regular coffee/food truck there. I think lots of family's would gather there during the week, and even more on weekends if this was available. It would be even better if a small permanent cafe was there… like something in Central Park with beautiful glass windows and outdoor seating and umbrellas. It would be very popular and absolutely beautiful	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
Allow provision to have mobile coffee vans access during the week days and weekends as Mums use Karrinyup Waters Caravan Park Playground for younger siblings and that venue being private attacks a lot of local younger mums with children during the week. Carine Open Space should have something akin to Karrinyup Waters Playground as well, being shaded and have separated age areas of it playgrounds. It would be great to see a similar setup at the Okely/ Carine Open Space new playground.	Noted.
Coffee shop/van.	Noted.
A coffee bar would be great!	Noted.
Accessible Play	
My eldest son is autistic - and would love to still use a playground - it would be good to consider the views of parents of children with disability, as the playground is a safe, great place to visit when families and children with disability are or at risk of social isolation (e.g. unable to participate in group sport or recreation). I think anything that considers some quiet spaces, or spaced out areas - i like the design at Rio Tinto Variety playground where there have 'Whirl the Spinners' - and children have to find particular plants or animals - activities like these sometimes help autistic children with structure in play spaces. If playgrounds become too busy, it is actually difficult to access with children with disability - we've found the 'super' playgrounds difficult to navigate, as they get so busy, so become overwhelming with an autistic child - but the most natural ones have been the best. We have spent so much time in parks as a family with an autistic son. It would also be good to consider spaces based on ages of children. also - the sandpit and sand table was a great space to play with little ones when my children were toddlers.	Noted.
Creating something more inclusive for all abilities, it's such a great opportunity to actually have a amazing playground in the city of Stirling, with some nature play and more inclusive thinks for kids with sensory needs, great examples are the pias place in caversham, the new nature play area in braithwaite park mt hawthorn and ivey Watson playground in kings park	Noted.
Love the idea of an accessible playground with stuff for ALL ages and abilities.	Noted.
Include disability friendly equipment.	Noted.
Accessible playground for kids of ALL abilities is also important.	Noted.
More inclusive and accessible equipment to cater for entire community.	Noted.
Improved accessibility for people with disabilities would be good.	Noted.
Natural wood / wheel chair / disability accessible	Noted.
Toilet	
Toilet For Daytime Use Only Sunup to Sundown perhaps set with a photo Electric Switch banning Entry at Night	Noted.
Please can the toilet faculties be improved they are really smelly and dingy. Not enough lighting and not child friendly.	Noted.
A good, clean toilet block near the playground. Children need quick access.	Noted.
Playground	
I'll leave that to the the parents etc of very young children. My grandkids, being teenagers need more advanced entertainment.	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
More for under 2s . No ledges onto hard surfaces like the current one.	Noted.
Consider all ages of children	Noted.
Zip lines are a big draw card, but the main thing would be more picnic facilities near the playground.	Noted.
Nature type playground Water playground Flying fox	Noted.
Expanding or having seperate play areas would be beneficial for kids if different ages.	Noted.
Monkey bars are very popular for kids and develop upper body strength and coordination so keen to see them in the park. I like the wood effect at Charles Riley but it doesn't have that much to offer	Noted.
Make it bigger with more things for the children to do. Not just slides and swings. There is so much space at Carine and so many people go there, so utilise it to the maximum.	Noted.
Flying fox, monkey bars, sensory , themed playground to link it into carine open space area maybe nature themed reflecting native fauna & flora. Ties to First Nation people of the area. Eg wellington square playground. Make it a landmark for suburbs around	Noted.
More of the same! Multiple slides and 3-4 swings would be nice!	Noted.
Would love to see a more natural, nature play area installed built into the hill, connecting up to the fenced dog area and more spread out with various different areas for picnic tables and play rather than just a traditional playground contained in a small area. This part of Carine is extremely popular during the week and especially weekends and I would love to see a natural space where families and friends can gather and enjoy nature whilst their children play. Would love to see more plants and logs, stepping stones and rocks incorporated and trees for shade.	Noted.
It'd be good to have a safe place for young toddlers who aren't safe on the ladders and big slides. An area for pottering about, maybe with a low ramp and slide and things to fiddle with (steering wheel, things to spin and move). Closer to the main park (not up the top where that little kids play table is). Some nature play- stepping stones/ logs.	Noted.
Pleases consider basketball, recreational mini cricket and four square being right next to the playground. Large scale nature play equipment and variety of play spaces would be wonderful, especially a junior bike track for youngsters with scooters and training wheel bikes. Please consider multi storey climbing towers, imaginary play houses, flying foxes, more swings and generally making the playground larger. Water play would be an amazing addition, something that is lacking in nearby spaces. There are incredible playgrounds in Bennet Springs and Whitman park area to draw inspiration from.	Noted.
Would love to see more swings set slightly apart from the rest of the playarea. Would also like to some water play area similar to Yokine open space. Wooden, nature play structures are also good with ropes for balance activities. (some good examples at Dunsborough) Children also love to climb and play over 'real' vehicles such as old boats and trucks that have been safely adjusted.	Noted.
Nature based play with greater incorporation of the hill on the west side. Wood and materials should reflect that found in the lake area and surrounding suburb.	Noted.
A mix of nature play & metal framed playground	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
The new playground should be more inclusive of all abilities and age groups with areas for younger children. If separate areas for varying ages or types of play visibility for parents with children of varying ages should be taken into account Integration of nature play elements should be considered BBQs should be further from the playground and not easily turned on my small children (as the current ones are) Picnic areas should be inclusive and there should be a few more. Trees should be retained	Noted.
Something that caters not just to under 5's maybe similar to Fremantle	Noted.
Love to see a nature play area, flying Fox always a bit for young and old plus ninja course for older kids. Keep existing sports areas like basketball ring if room a bike track would make it a playground to be jealous of.	Noted.
Please consider a flying fox like in North Beach!	Noted.
More bike racks.	Noted.
Keep the same footprint size.	Noted.
It would love to see either more swings or no swings. Play equipment made from natural materials so that it doesn't get so hot in summer Equipment that allows for balance and risk taking and affords open ended pretend play	Noted.
Please don't put in a separate baby and bigger kid park, I have three kids from baby to 5yo and I need to be able to watch them all at the same time, which I currently can. Also the new slides going in at Melene park and Greenlaw park are just too high.	Noted.
A large shade sail to cover the whole playground. No sand. Instead new safe product under the whole playground. Soft enough and doesn't get hot.	Noted.
Perhaps a water play area? monkey bar/ninja warrior/high ropes climbing section? Imanginary play area, a boat?	Noted.
Could be bigger with more interesting equipment for a park this size	Noted.
A nature playground.	Noted.
More swings available as they are always popular. Consider adding a toddler climbing area for younger children who are not quite ready for the bigger playground.	Noted.
Needs more adventurous facilities for older children. More natural look, rather than bright, plasticky colours	Noted.
No rubber on the ground. It's way too hot on the feet.	Noted.
Add some more challenging climbing structure for older kids (e.g. 9 or 10 years old)	Noted.
More shade coverage needed above playground. Also would benefit from additional seating, we often get bit by ants while sitting on the ground.	Noted.
Please go beyond just replacing like for like and improve the area. Transforming to a nature playground with a water play area, like the dinosaur park at Kingsway Reserve.	Noted.
A range of age appropriate play equipment. Charles Riley playground is fantastic for older kids but not great for babies and toddlers. The play equipment that is currently at the Carine park is really great for toddlers and it would be lovely to keep it the same / similar. There is a park in Padbury that has a scooter trail going around the playground equipment, this could be a nice idea for Carine playground.	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
My older son has sensory needs and has always gravitated to be solo, and use the sand areas. I'd suggest to consider sensory needs. Include a waterstream area for 'pooh' sticks or leaf races. And similar to the Chevron parklands, an area to build your own giant stick teepee. Plus, a Flying Fox or Bike Track would be a big drawcard.	Noted.
Something similar to Juniper park in duncraig would be nice. More nature play incorporated.	Noted.
a flying fox type ride incorporated or older children's equipment	Noted.
Flying fox with double seats would be amazing! Additional swings also great as they are always popular and a wait to use them (but right now there is only 1 bigger kid swing). We'd love a pump track for bike riding too.	Noted.
Just more drink fountains and seating all around the park and upgrade the paths	Noted.
1-What about a massive nature play? Water features, logs for climbing, building etc? Think Dunsborough's recent addition. 2-A bike pump track on the hill that runs adjacent to Oakley Road which is currently brown grass. 3-Hopscotch marked out 4-Rock climbing walls 5- A large scale climbing structure- think the whale at Scarborough or Busselton's sinking pirate ship 6- Some permanent shade provision built into the design... the current slides get so hot at times	Noted.
More nature play and some activities for younger kids	Noted.
Carine Open Space is an important community resource that benefits not only local residents but also those living in nearby suburbs. To make the park even better, I would like to suggest that the city considers expanding the play area and adding new play themes. This would provide more opportunities for children to play and explore, as well as attract more visitors to the park. With these enhancements, Carine Open Space would become an even more valuable asset to the community.	Noted.
Feel there is an ideal opportunity to do a nature playground like the one at kings park.	Noted.
We need a good flying fox. More advanced playground stuff as well, like spider Web.	Noted.
It needs to be usable for kids of all ages like small slides and solid stairs with hand rails for little legs and sensory/interactive walls. Water play would be an amazing addition.	Noted.
It could offer more nature play like equipments and challenges to suit a broader range of kids age.	Noted.
I would also like to see more tables, benches and barbeques under the naturally shaded areas north of the current playground. This area is a lovely place to be in the summer months but is currently rarely used for picnicking despite the toilets being handy and parking available close-by. There would be no need for costly shades as the trees are a perfect alternative and as many of them are deciduous they providing light in winter. That area is also just that little bit further away from the water, providing added safety for little ones.	Noted.
A small pool area or water fountain or Flying fox!	Noted.
Keep it safe for toddlers please and keep the normal swings. Those huge tyre swings are a hazard and useless for small children.	Noted.
Some nature or water play pieces would be great. Like Lake Monger	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
Nature play and climbing would be fantastic while keeping the basics (slide, swing, monkey bars). The slope provides an amazing opportunities for a nice long zip line. Once developed the extra people attending will mean there will need to be an extra toilet block, water fountain and BBQ. More trees for extra climbing and shade (not shade sails).	Noted.
Would be awesome if it could be made for all ages, some parts of the playground for small, toddler like kids, and parts of it for older. Maybe a theme throughout? (Ie pirate park in Applecross or the ship in the Busselton foreshore. Bailey brewing in the swan valley also have an awesome playground that this could be modelled on!) Also, it's important that the playground is covered/shaded from the sun. This one is quite well positioned, though I think it would be good to ensure that it is shaded from the sun for majority of the day so that it can visited at all time and all weather. Might be pushing it :), but would be AWESOME if part of the playground could be a water park (ie Maylands WaterPark is awesome of maybe Kingsley Dino park)!	Noted.
Charles Riley does not cater for both my children's needs. I spend most of the time running my youngest up and down on the flying fox. The climbing structure is too complicated for younger children. I'd love to have a "modernised" playground, with climbing/walking ways that cater for the younger and older children. A pump track or scooter/bike track would be a lovely addition.	Noted.
The small sandpit at the top could certainly do with an upgrade and be ranked a bit more often.	Noted.
More nature play, lots of shade, water play	Noted.
There needs to be more swings, there isn't much for really young children but they do love swings. Make sure the rails on equipment are low enough for small, young children to hold onto and can't slip under.	Noted.
More swings for all ages. Permanent shelter for winter play aswell. Light coloured flooring so can be walked on during summer. Drink fountain right by. More rock climbing and woven climbing areas. Picnic areas needed close by. More tunnels. Nature playground with play fountain.	Noted.
I think it can use the geography better from the carpark side down toward the water to utilise the downward slope for flying Fox.	Noted.
Perhaps a range of developmental equipment for different age groups - could be combined but given space might be two areas. A more adventurous style of playground might be fun also. Experiential type equipment might also be good.	Noted.
Ramps for all abilities. Lots of shade from trees and shade sails. The park at whitfords nodes, Garvey park in Ascot and the all abilities playground in Dalkeith are all amazing, as they cater for all ages and abilities.	Noted.
We love the format of the current playground and will be very disappointed to see OT changed to something like charles riley. We would prefer something similar to what us there now. Thank you.	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
Climbing walls for pre schoolers and primary schoolers. Driving lanes around outside of playspace/s for small children to learn traffic rules on their little bikes. Bigger and varied music board at one of the playgrounds or at one end of a bigger playgound. Water more of the grass south of the current play area, with more shaded picnic tables and increased parking on west side of park extending south also, along with many more bins. (Shouldn't we have recycling bins also) More swings including more baby swings and a saucer swing with plenty of space around them. Beams for balance practice - noted deficit in pre-primary aged children. Water play (maybe available at set times) See Darling Harbour for ideas. Children need to develop their gross motor skills in order to form an association with fine motor skills that come next in their development. Park play is a valuable tool to assist in this development. The more interestng the play, the longer people will stay in the outdoors = better mental health, Vitamin D, socialisation for children, time away from screens.	Noted.
We'd love something similar to the whale playground in Scarborough	Noted.
Could we consider water play? Like at Hyde park. More swings please -there's always a queue Natural/recycled materials Playgrounds my children love include flying foxes, opportunities for imaginary play like little shops, water play and sandpit toys like diggers.	Noted.
As above. Playground is dated and needs a complete rebuild with natural materials	Noted.
Sand play table, more toddler friendly climbing equipment by keeping open areas to a minimum. More toddler swings,	Noted.
Maybe a bigger rope climbing frame, Larger slide and a theme to the play ground like nature or plastic but I would very much like nature theme. But mainy not for me put in a disabled flying fox like the box ones.	Noted.
There should be a nature playground area for climbing and discovering. Every scientific study into childhood development talks about having more nature play equipment with logs, steps, rope swings and tunnels. The built/structure playground needs flying foxes and a large rope climb, like the Carine Primary school has. There should be a safer space for smaller kids, like the double slide and drum section already there, but have it further separated.	Noted.
Having games for the smaller children	Noted.
More themes play eg a boat or castle etc	Noted.
To accomodate all ages	Noted.
Would be great to have some sand "toys" meaning a setup for pouring sand or playing with it.	Noted.
Need more BBQ	Noted.
I would like the inclusion of the following: - rest areas, grass and tables inside the fenced area -flying fox	Noted.
Nature based, water play.	Noted.
It would be nice to have an undercover area on the playground for birthday parties etc	Noted.
More nature play elements.	Noted.
Improved shade Greater variety of equipment	Noted.
I am confident the experts will add innovative, safe and creative additions in the upgrade	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
We love what Charles Riley offers. We would like to propose a pump track as well, similar to Leedervilles or Dianellas to give the active older kids something to do. A play space with a wide appeal in age with good areas for parents to mingle and watch the kids. Good clean BBQs for birthday parties	Noted.
Variety of seating close to the playground for adults.	Noted.
Flying fox should be upgraded Nature play Bike track and jumps	Noted.
A few more grassed areas Picnic tables	Noted.
Also would be great to have something fun for 9y old and older Zip line/ led lights so the evenings play could be fun / make it big ☺ and thank you for doing this for our kids and the suburb!!	Noted.
Carine open space is known for its 'lake/pond' and birds. It would be great to incorporate those themes as part of the local 'statement' park - maybe bird feeding and bird observation stations, a tall slide with a bird motive etc	Noted.
Fully shaded, add a flying fox	Noted.
It would be great if there are places for toddlers and school aged children to play safely together like it's currently setup. But with an upgraded version. A nature Play aspect would also be great like the playground in Kelvin Park near Davallia PS. It would also be great if there is a place for parents to sit like the walls currently and have an overview of the entire playground. Looking forward to seeing what the team comes up with!	Noted.
More for older and younger children. Some nature play areas maybe?	Noted.
Make it more of a nature playground like the ones at kings park, Dunsborough. Good for up to 10 years old too.	Noted.
more soft fall floor.	Noted.
Flying fox, shipwreck, monkey bar swings, undercover shade sails,	Noted.
Would absolutely love to see water splash play in the upgrade. Similar to that at Madeley dinosaur park or Hyde park…means that on very hot days at any time of the day the kids can play	Noted.
Just don't make it smaller or worse, make it similar and if anything much bigger and even better also, maybe a real long flying fox, allow for population growth, allow for all age groups so little kids are not intimidated by older kids needs to have/keep shade, don't make it to modernised some of the new stuff is less enjoyable then the old skool equipment	Noted.
also having two play area would be very beneficial, one with smaller safer lower levels for e.g. smaller climbing stairs, smaller slides, smaller little swing and then can create a normal playground so kids that are 5/6 plus age that run flat out playing chasey knocking over little kids won't happen. Another idea would be to create man made hills with climbing equipment up the side and slides down the other side so if the kids try to get off they are right next to the ground. There should also be an area for people with disabilities there isn't anything at all currently. A water play area would also be wonderful. Inground Trampolines would be great too. Having a cleaner and make/female/gender neutral /acrod toilets is also a requirement I feel. I am very passionate about the above as a mum or three little girls that lives very close would love facilities that are more age appropriate and safer I would use the area more frequently.	Noted.
Have some nature playground options.	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
Nature play, water play	Noted.
No smaller.	Noted.
Nature playground	Noted.
Natural playground area such as the logs and suspended walkway would be great.	Noted.
Would like to see better use of the south / Western side of the park. Maybe bike trails or more tree plantations.	Noted.
My family and I often drive to water play parks for the kids, we would love to see one installed in the new playground. Or a pump track for the kids bikes and scooters.	Noted.
I think with the space you have it could be more of a nature playground as well, for the older ones. A water play area would be amazing. And more picnic areas and barbecues for those who need one. Just go down on the weekend, and you can see. Kids need to explore and grow with perhaps puzzles (watch Survivor) haha. So many children don't have backyards anymore and this is beside organised sport, somewhere they can have fun and learn. The older kids 6 to 12 really don't .have any where to go except hit the trees with sticks . So common on the weekend. Let's bring Kings Park to Stirling! Also asponsor would be great to build this park,with advertising and more money for bringing this dream to happen. HBF use the park perhaps them, a bank or a mining company. Let's go big or go home haha	Noted.
Some seating for parents, new playground equipment as it's quite congested and I feel a couple more additions would really compliment the playground well.	Noted.
It would be great to have different zones for all aged children with the addition of sensory elements, including water play. The addition of more toilets and more shaded areas would be fantastic too! Thanks	Noted.
Add zip line from top car park to bottom	Noted.
The playground equipment needs to be multi age use including those just walking and primary school age. The needs to be safe, wide and multi sensory and permit children to use their imagination.	Noted.
The ages of the children using the area is very diverse. My grandchildren use the area all the time.	Noted.
May I suggest a separate toddlers area for ages say up to three, under shade cloth with parents seats nearby.	Noted.
I hope they won't downsize it, I actually think it is fine and doesn't need redoing so worry changing it will detract from what's there now. I hope they keep the same appeal for all ages in terms of ramps/stairs (as opposed to just ladders), lots of slides, monkey bars, swings, climbing frame, rockers and space underneath for shops and play. The Charles Riley playground main structure is only suitable for slightly older kids (being so high up, and having tricky climbing obstacles to the top) so I hope we can keep Carine's more toddler- or all ages-friendly	Noted.
Upgrade similar to scarborough/ pias place. Current playground is good but for the space available it could be amazing.	Noted.
Additional infant (bucket) swings, as only 2 are are present and are heavily used. Option for a kids operational "digger" in the sand pit Stepping stones/balance beam and nature play section if possible	Noted.
Obstacle course style would be good	Noted.

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
Nature play based (Yokine Reserve Play space is an example) Areas for toddlers/younger kids as well as older kids. Possibly a fenced area?	Noted.
I've seen a few playgrounds in and out of Perth that have separate areas for different age groups. I think it is such a thoughtful and wonderful project as a lot of parents with little toddlers find it dangerous when big kids run around fast and also big kids' parents also advise their children to slow down or be careful around little ones. I think both big and small children should be able to play in a safe environment without worrying about accidents.	Noted.
Would be good to have some more features for smaller kids to explore, water and sand features	Noted.
Nature play with sand and shall rock base, no hard surfaces and rather than a limestone build up why not integrate the edge of the playground more with the surrounding lawns and gardens. For example The little playground at Trigg behind Canteen / Braithwaite Park / Whale playground - notice how they just flow on from adjacent surfaces and a mix of levels and textures. Flying foxes are my Childrens favourite play item !	Noted.
Parking	
The area really needs additional parking. The current situation has the ground very worn and an eyesore. It also seems to be an invitation for hooligans to take the cars onto the ground and dig up with wheelies.	Noted.
Fix the parking first first	Noted.
Definitely needs more parking.	Noted.
Weekend parking when there is parkrun or baseball in mornings is overflowing. Clear signage on appropriate overflow area would be good.	Noted.
Other	
The Bike Path that leads up to the playground currently stops near by - Ideally this could be extended to continue down the west side of the lake where it turns into a narrow walking only path. Expanding this pathway to including a cycle path alongside (similar to the rest of the park) would be amazing.	The existing shared use path has been replaced by the verge path installed along Beach Road. The duplicated paths running east-west through the middle of Carine Regional Open Space will eventually be rationalised to a single path. That work is outside of the scope of this project. Amendments to paths around the playground will be considered during the design phase.
Accessibility around the playground would benefit from improvement. The current footpaths are standard size and aren't adequate for the traffic that the playground area and surrounds receives. The area is very popular and there are many people walking, jogging, riding bikes, pushing prams, and waking dogs. The current footpath would benefit from being much wider to accommodate safe flow of traffic. There is a designated bike path in some areas of Carine Open Space, but this does not continue all the way around. This means that bikes often share the same path as walkers, runners, dogs, and prams. When it is busy, this can be hazardous. It would be great if the City would consider extending this bike path and widening the pedestrian path for accommodate the high volume of traffic. Perry Lakes Reserve is an example of wide pathways that function well for all uses or types of transport/traffic.	
The existing bike path that runs east-west from playground to RDA Carine suffers from ongoing problems with roots, causing dangerous bumps in the path. The walking path alongside the bike path should be made more attractive for walkers, as they frequently prefer walking or running on the bike path.	

Do you have any thoughts or suggestions on the new playground?

Comment	City Response
Whilst I admire the focus on a “children’s playground” you could also reach a larger user group by incorporating a small area for body weight exercises for adults. This could entail a simple setup of a basic chin up bar, parallel dip bars. With the record and growing level of obeisity in our community this is one way to help time poor parents to get in some quick exercise while they take kids to the playground. Having worked in Singapore for 10 years, I know that almost every local childrens playground contained some kind of chin up bar / dip bars of some description which increased the chance of a quick weight bearing workout exponentially:)	Noted.
One other point to help address adult obeisity while I’m here - the tennis courts in city of Stirling require a key to open which makes their usage a lot less frequent than the sister city of Joondalup courts which are always open (and free). By removing a barrier to their use (ie to book court, get key, return key) city of Stirling could really improve the usage of their tennis courts which is also a fantastic asset which appear to be under utilised.	This comment will be passed on to the City's Leisure Services team for their consideration.
Playground on Monyash Road needs replacing. It’s ran down and there’s no shade anymore.	This playground is currently scheduled for renewal in 2027, pending Council budget approval and asset condition.
Add a pathway to the dog park and also extend parking lot towards that area.	The path adjacent to the parking area connects the dog park to the reserve path network. Improvements to the fenced dog park are outside of the scope of this project.
Skatepark to be upgraded. Utilise other areas of the park corner of okley and Reid for a mtb/pump track along with additional toilet.	This is outside of the scope of the community parkland project.
Improve the dog areas the grass is easily damaged.	This is outside of the scope of the community parkland project.
